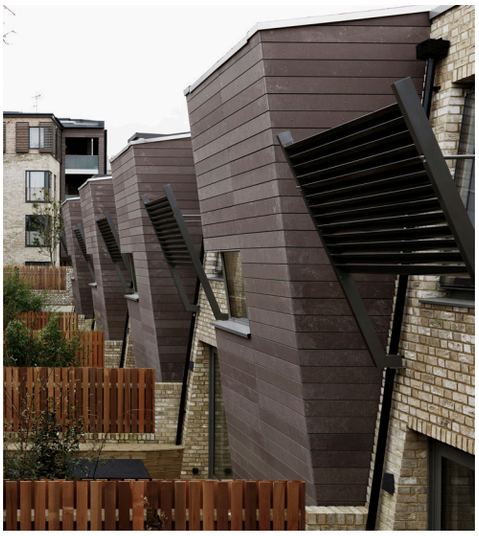
öko skin

glass reinforced concrete (GRC) slats



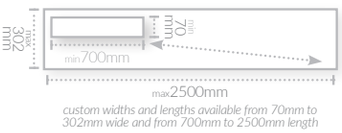
The ideal alternative to timber or bricks facades without the maintenance, Rieder's GRC slat panel system offers A1 fire performance and zero maintenance.

öko skin panels do not require sanding or painting before application, proving ideal for quick and simple installation. The various surfaces of öko skin panels create a lively interplay of colours and textures. öko skin panels are durable, impact resistant, and BBA approved.

Sizes

Basic

Custom (flex)



custom widths and lengths available from 70mm to 302mm wide and from 700mm to 2500mm length
